### Certificate of D-Blaze Fire Retardant Treated

12/15/14

TO WHOM IT MAY CONCERN:

This is to certify that the lumber/plywood supplied to: Ace Contractors, Austin, Tx Was pressure treated with D-Blaze (Phospho-Ammonium-Boron Complex) in accordance with the conditions as outlined in the American Wood Preservers (AWPA) Standard C-20 for lumber and /or C-27 for plywood. Results of treatment shall conform to Paragraph 2.2.1:Fire Classification: "Material shall have a flame spread index of 25 or less when tested in accordance with ASTM E-84, Standard Test Method for Surface Burning Characteristics of Building Materials and the material shall show no evidence of significant progressive combustion when the test is continued for an additional 20-minute period. In addition, the flame front shall not progress more than 10.5 feet beyond the centerline of the burner at any time during the test."

This material has been dried at temperatures not exceeding 160F in accordance with AWPA Standards C-20 for lumber and c-27 for plywood, Paragraph 2.1. The average moisture of lumber two inches or less in thickness is 19% or less, and plywood is 15% or less.

I certify the above to be true and valid information.
